# EMLC

Finding & Viewing Information in Multiple Languages made simple.

## EMLC Content Previewer

Using assisted translation tools and corporate lexicon, provides the ability to quickly translate and review document content stored in other languages in the end users' own language with a simple click of a button. As a “Previewer”

- ✓ Empower users to understand and leverage corporate assets in other languages more efficiently.
- ✓ Ability to present knowledge of content without legal liability

## New! EMLC for Records Management

- ✓ Extends EMLC functionality to Records Management! Code descriptions, comments, classification fields and more.

## New! EMLC for Workflow

- ✓ Extends EMLC functionality to workflows! Attribute names and values, instructions and more!
